

Education and Certification Courses

Give your team autonomy, mastery and purpose with your lubrication program.

We offer courses that fit your training needs no matter your teams' level of involvement and experience with your lubrication program

Comprehensive Oil Analysis Course

- COA Course is designed for all levels of personnel involved in the lubrication program and will elevate the level of competency by strengthening their lubrication and maintenance skills.
- Material covered in the course meets the requirements to challenge either the MLA-I, MLT-I, or OMA-I certification exams, if desired by attendee. Certification not required in order to get value out of the course

CLS Certified Lubrication Specialist

- Course is designed to prepare attendees for the highly coveted STLE CLS certification exam.
- Obtaining a CLS certification is the pinnacle of certifications and shows you have mastery of your craft in lubrication.
- Successful certification requires at least 3 years experience and a base knowledge of combined on the job experience, self-study, and training.
